

3d Simulation - Make A Mold Box!

In this video, I make a plan for building a mold box, 3d model the pieces, simulate it working, and then make a materials list to take with me to the material building supply store. The planning process in Fusion360 is painless, it helps me determine the amount of materials I will need, and dimension a drawing from that quickly. It also allows me to simulate the use of the mold box, which is cool!
